COMPANY PROFILE

ABOUT YOUNGY GROUP

YoungY Group was founded in 1995 by Mr. Lv Xiangyang.

So far, YoungY group has invested in enterprises with a market value of more than USD 130 billion, assets of more than USD 44 billion, the operating revenue of more than USD51.5 billion,and more than 350,000 employees.

The industry involves more than 10 industries, such as the new energy industry, display technology industry,education technology industry, biomedicine industry,resource development and processing industry, scientific and technological innovation investment and financial investment.

ABOUT

YOUNGY HEATLH CO.,LTD

Youngy Heatlh Co,Ltd belongs to YoungY group, (formerly Anhui Saunaking Co., Ltd, one of the leading professional manufacturers and exporters of sauna equipment, Through more than 30 years of development, now it has been improved into three factories with 100.000 SOM production base, more than 1,000 employees, nealy 30 R&D Engineers and 40 Professional QC, Headquartered in Hefei with 2 subsidiar plants in Lujiang and Wuhu city.

In 2011, it was listed on Shenzhen Stock Exchange and successfully entered the capitalmarket. Stock code 300247.

Since the establishment of transforming the big health industry in 2015. From focusing on sauna equipment manufacturers, it has gradually transformed into a large domestic health industry integration platform Integrating production, supply and marketing health services. supply products including sauna room, carbon crystal electric heating products, inflatable sauna,inflatable board,spa and other inflatable products, commited to becoming an excellent enterprise in the domestic health industry.

Youngy engages in R&D, manufacturing and global marketing of sauna equipment and has more than 200 different designs, in 2010 established a strategic cooperative relationship with institute of Inteligent Machinery, Chinese Academy of Sciences , to build the far-infrared health promotion technology Research Center, which is one of the rare enterprises in the industry with sustainable independent innovation ability and independent brand.

After many years of development and expansion. Youngy Health products have passed domestic and international certifications including BSCI, FSC, SAA, ETL, CE, CB, KC, PSE, etc, Youngy Health has been substantial in its prospective industries and will continue to innovate the consumer home market.

中国科学院
CHINESE ACADEMY OF SCIENCES

Chinese Academy of Science

Far Infrared Health Promotion Technology Research Center

QUALIFICATION

We passed the ISO9001 quality management system certification and ISO14001 environmental management system certification; Our products also passed the domestic and international safety certification like CCC,BSCI,FSC,Europe CE/RoHS,North America ETL, Saudi SASO,Australia SAA,Kuwait TIR,Japan PSE,South Korea KC, GMP,FCCA,SEDEX,WRAP,etc.

HIGH LEVEL R & D PLATFORM

As a national high-tech enterprise, provincial enterprise technology center, Youngy always takes technological innovation aspriority. in April, 2010,Youngy established the strategic cooperative relationship with Chinese Academy of Science, building the first technology research center of far infrared health promotion,having access to technology, PID temperature control technology multiple security protection technology of 49 core technology patents, is one of the few companies which have continued independent innovation ability.

KNOW HOW

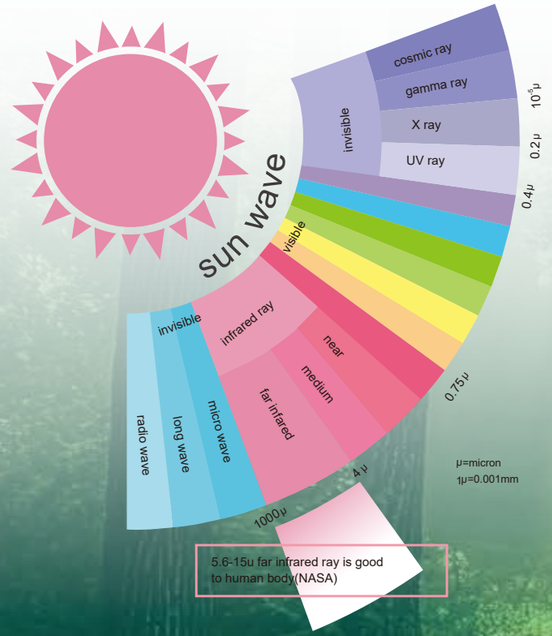

WHAT IS FAR INFRARED

The complete spectrum of sunlight consists of visible rays. The visible rays are red, orange, yellow, green, indigo, blue, and violet in color, known as rainbow colors. The invisible rays are Ultra Violet., X-rays, Gamma, osmic, Microwave, Long Wave, Electrical Wave, and infrared.

Electromagnetic waves between visible light and the microwave are called infrared waves. The wavelength of infrared waves ranges from 0.76 microns to 1,000 microns. Infrared rays vary in wavelengths, and are categorized as near infrared (0.76 to 1.5 microns), mid infrared (1.5 to 4 microns) and far infrared (4 to 1,000 microns).

The most noticeable is far infrared waves:
Radiation: Far infrared rays radiate or spread from a localized source.
Penetration: Unlike visible light, Far infrared rays can deeply penetrate skin and the underlying tissues up to 1.5 to 2.8 inches (approx. 3.75 – 7 cm).

Resonance: Far infrared rays naturally generate heat by causing the body’ s molecules to rapidly vibrate against each other.
For further information, the natural resonant frequencies of molecules of water and organic substances are within the Far Infrared rays frequencies (wavelength of 5.6 to 15 microns); therefore, water and organic substances bsorb energy easily from this radiated Far infrared rays. Since it is their resonant frequency, they vibrate vigorously at that frequency and become the radiator of the frequency as well as its receiver. There is more water inside of our body than on the skin surface; therefore, FIR wave deeply penetrates the body (1.5 to 2.8 inches).

HOW IS FAR INFRARED SAUNA

Infrared Saunas are unlike conventional saunas which pull sweat out of the body. Far infrared energy penetrates up to 3 inches(approx.7.62cm) into the body and PUSHES sweat out of the body. As the body is heated from the inside out, it forces toxins under the skin out.

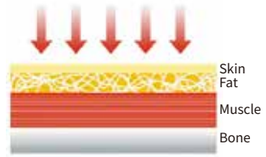

The temperature of a far infrared sauna is typically between 90 – 120°F (approx.32~49°C) versus a traditional sauna which operates between 180 – 220°F(approx.82~104°C). However, despite operating at a lower temperature, you will typically perspire far more in infrared sauna because the infrared energy penetrates your body at a much deeper level. Fat becomes water soluble at 100°F(37.8°C) when it begins to dissolve, move through the blood and finally is removed from the body, resulting in weight loss. Toxins are also eliminated through your skin using lower, comfortable temperatures, for rapid detoxification.

Having warmth in order to help you achieve health benefits after exercise.
Youngy cares and loves life.We are always dedicated to createa healthful product.

Cell movement and sweating a lot can help you remove the accumulated toxins and acidic substances and adjust the body acid-base balance,Cancer prefer acidic,do you want to be more healthy?Look after yourself and obtain a slightlyalkaline body balance!

Just sit quietly, cell"was exercised",body was sweat. 30minutes can produce about sweat 500CC.500CC sweat=10000M jogging.

Sweat steaming SPA and far infrared warming not only burn fat,it can also produce a large number of fatty sweat,Grease has the function of maintaining skin.The process of eliminating fatty sweat is also a travel through dermisskin be smooth and delicate more naturally from the inside out!

Osmotic effect
Replenishing the energy of living cells

Resonance effect
Eliminate acidic substances in the body

Warming effect
Increasing body temperature

WHAT IS A FULL SPECTRUM INFRARED SAUNA AND HOW DOES IT WORK

A full spectrum infrared sauna is a type of sauna that uses heaters that emit all three types of infrared radiation: far infrared, mi dinfrared, and near infrared. Each type of radiation ofers its own unique benefits, making a full spectrum infrared sauna a versatile and effective way to improve overall health and well-being.

WHAT’ S THE DIFFERENCE BETWEEN NEAR-INFRARED, MID-INFRARED, AND FAR-INFRARED

The near-infrared heaters emit wavelengths of approximately 780 nm to 1400 nm. These wavelengths penetrate deep into the body and can potentially reach internal organs and tissues. In addition, these wavelengths can also reach the subcutaneous fat layer, which is beneficial for weight loss, healing and skin rejuvenation.

The mid-infrared heaters emit wavelengths of approximately 1400 nm to 3000 nm. These wavelengths are said to penetrate more shallowly into the body and primarily heat the surface of the skin. These wavelengths have a similar effect to sunlight and are said to be beneficial for relaxation and stress relief.

The far-infrared heaters emit wavelengths of approximately 3000 nm to 1 mm. These wavelengths can be absorbed by the body, causing the body's temperature to rise. They are also said to be beneficial for detoxification and sweating.

ICE BATHS

Benefits of ice Baths

- ✓ SHORTER RECOVERY TIME POST-EXERCISE
- ✓ PROMOTES NEURAL AND CARDIO VASCULAR SYSTEM RECOVERY
- ✓ TREATS MUSCLE/JOINT SORENESS,STRAIN AND INFLAMMATION
- ✓ REDUCES FATIGUE -LOWERS THE RISKOF INJURY
- ✓ FASTER RESOLUTION OF SOFT TISSUE INJURIES

Features

- Cooling down to 37.4°F/3°C
- Plug & Plunge
- Indoor or Outdoor
- Long Lasting Durable Tub
- Circulation Filtration
- Fine Canadian Cedar or Hemlock

PRODUCTION FACTORY

Canadian Timber

① Canadian timber is a valuable timber, which has beautiful lines, good effect of heat insulation and sound insulation, and emits a pleasant natural fragrance.

② Cedar contains rich anti-corrosive material , which has antiseptic effect and plays a special role in alleviating fatigue. With high structural stability, it is not easy to crack in case of large temperature fluctuation.

③ Cedar can reflect far infrared ray as well, so more far infrared ray can be absorbed by human body .

④ Canadian hemlock is the perfect unity of strength and appearance. Not only does it make the cabin stronger, long service life, but also it emits a natural phytoncid fragrance with effect of brain refreshing and pressure relieving .
