MERICAN®

Light Therapy Series

MERICAN HOLDING GROUP

GUANGZHOU MERICAN OPTOELECTRONIC TECHNOLOGY CO., LTD.

Corporate Culture

18 YEARS
18 years of focus in optical health and aesthetic technology

100+
Products distributed to 100+ countries and regions worldwide

10000+
global partner and client cases

60+
internationally recognized certifications

100+
utility model and invention patents

120+
industry and institutional awards

500+
professionals across R&D, manufacturing, and operations

Data accurate as of January 2026

Corporate Profile

IN THE NAME OF LIGHT WE DEFINE THE BEAUTY OF WELLNESS.

We believe that light is a fundamental source of life and vitality.
We do not merely manufacture products; we are also defining the optical health aesthetic language that has swept across Europe and America.

Merican was founded in 2008. With 18 years of in-depth expertise in phototherapy technology, it is a high-tech enterprise and a Guangdong Provincial "Specialized, Refined, Unique and Innovative" enterprise, integrating R&D, production, sales and after-sales services.

Endowed with robust capabilities in R&D, design and manufacturing,Merican holds over 100 industry patents. Its products have been certified by globally recognized authorities, including FDA, CE, RoHS, UKCA and FCC.

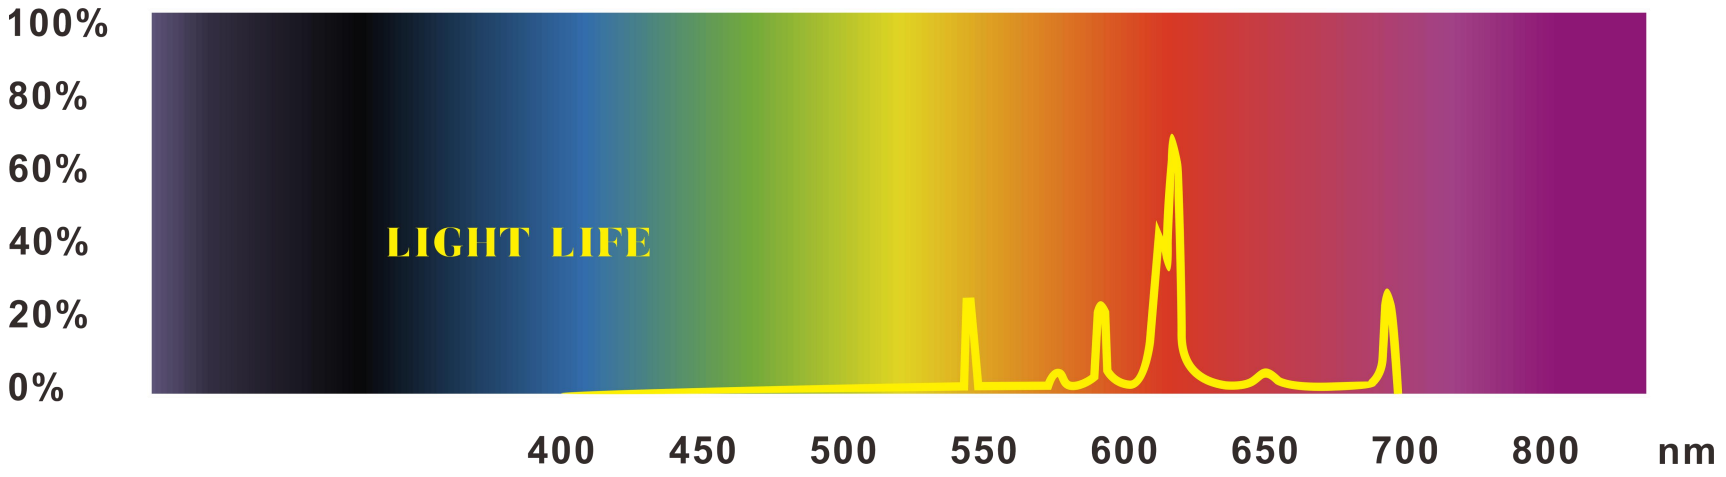

LIGHT OF LIFE, ILLUMINATING BEAUTY AND HEALTH

Sunlight is responsible for the life, aging, diseases and death of all living creatures on Earth. All living things rely on sunlight for survival. Sunlight can be regarded as the very essence of life.As early as thousands of years ago, Hippocrates, the father of ancient Greek medicine, already regarded sunlight as a means of preventing diseases and regulating the body.

In the field of optics, the light waves ranging from 500 to 1000 nanometers in the visible light and infrared light spectrum are the most significant light bioactive bands that interact with human tissues. Different wavelengths of light present different colors and exert different effects on the human body. Scientific research has shown that light of different wavelengths can activate cell activity, promote blood circulation, accelerate metabolism, and cause important biological effects in the body and skin, thereby achieving therapeutic and restorative effects and allowing damaged tissues to regain their health and vitality.

Mechanism of Action

LIGHT IS THE ENERGY CODE OF BEAUTY AND HEALTH

LED Light Therapy Bed utilizes unique light source technology and precise spectral regulation technology. It selects various core light waves such as red light, near-infrared light, and yellow light from the 500-1000nm spectrum. Through wavelength matching, energy regulation, and timing coordination, different light sources form a "synergistic effect", breaking through the limitations of traditional single phototherapy and achieving deeper penetration and more comprehensive therapeutic effects on the human body.

The Red Light Therapy Bed demonstrates notable efficacy in improving the circulatory system (particularly cardiovascular and cerebrovascular diseases, as well as other circulatory disorders), repairing various tissue pains and neural discomforts, promoting metabolism (addressing metabolic diseases), boosting overall immunity, and enhancing sleep quality. It also stimulates the body's self-repair mechanisms and cellular regeneration capabilities, delivering significant results in physical recovery and holistic health regulation.

Sedation & Analgesia

Injury Repair

Anti-Aging

Mood Enhancement

Inflammation Relief

Sleep Improvement

Acne & Scar Reduction

Circulation Boost

Fat Reduction & Body Contouring

Constitution Strengthening

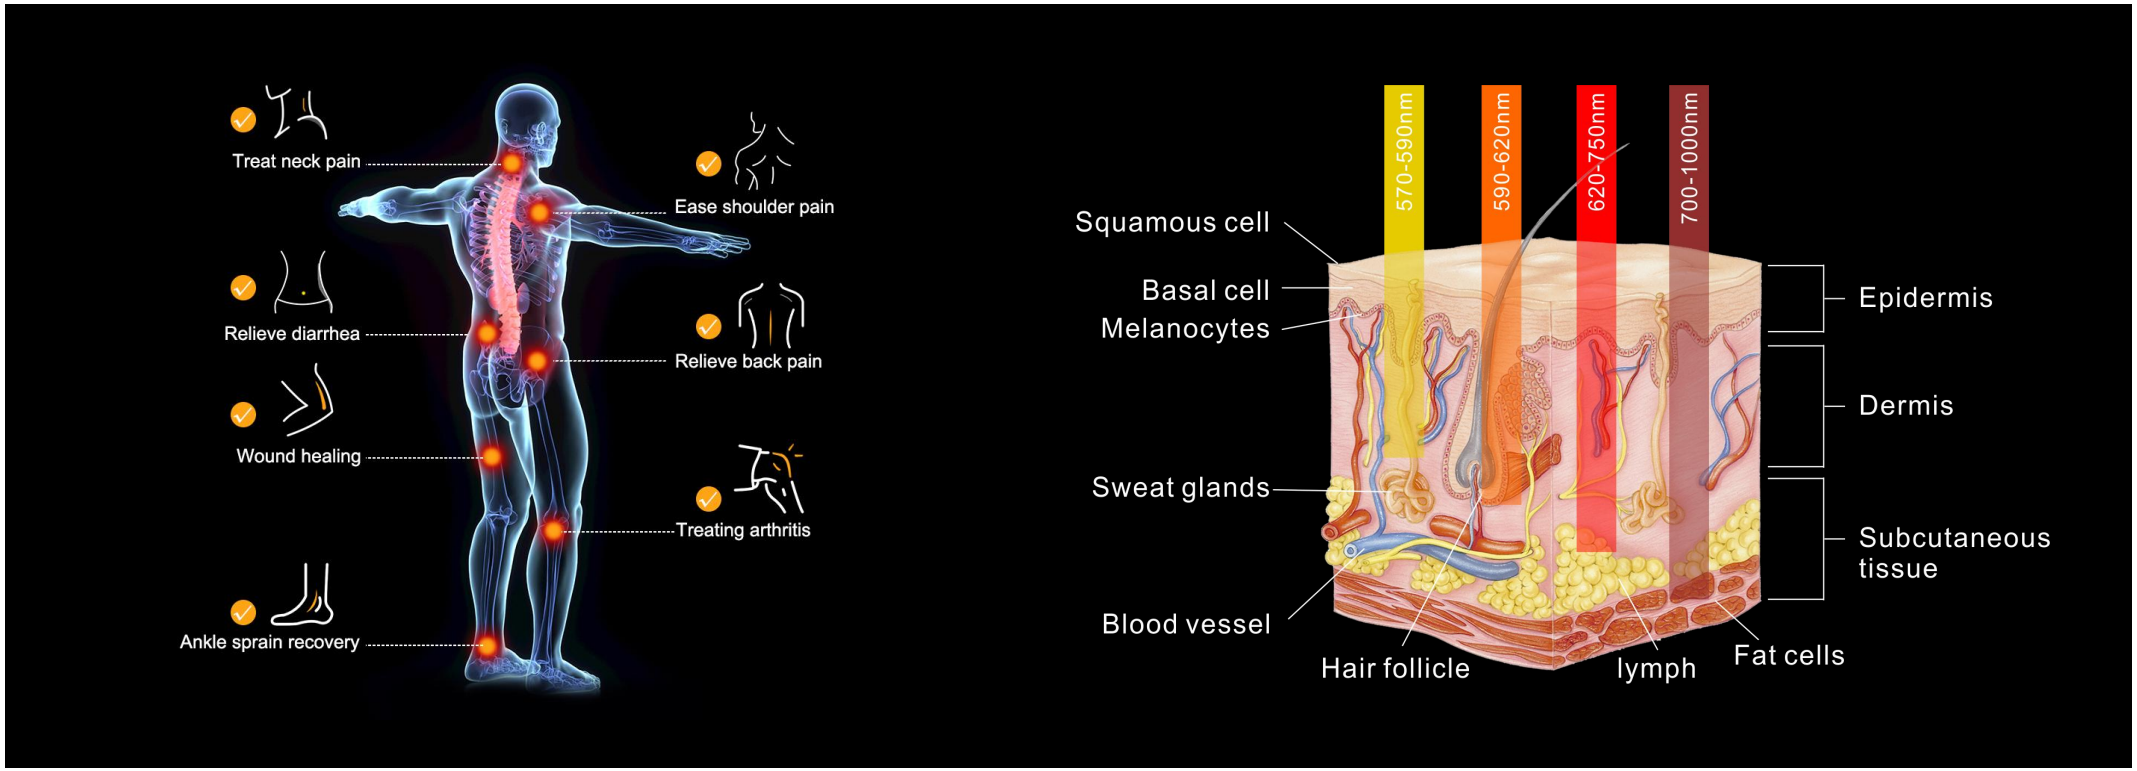

Fatigue Relief

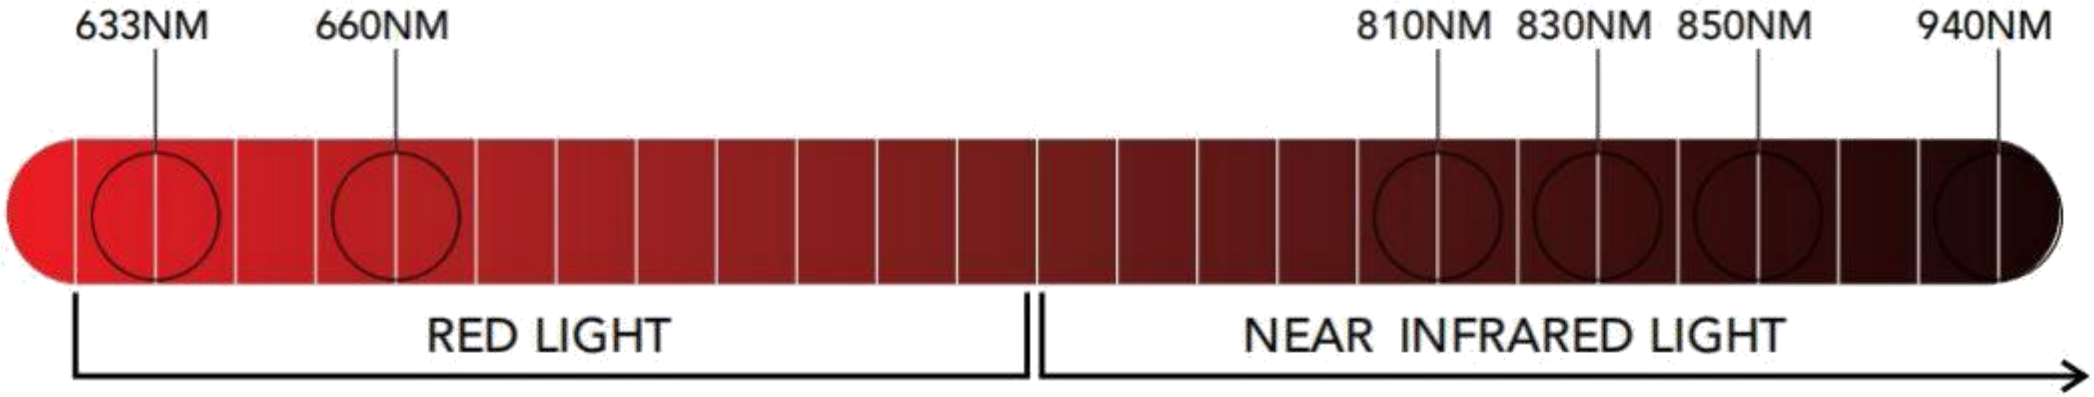

Collagen Stimulation

Mechanism of Action

The Red Light Therapy Bed utilizes LED composite light source technology developed by the "Optical Energy Research Center." Through special optical filters, it achieves multiple precise wavelengths. These wavelengths offer advantages such as high energy, strong penetration, and protection of vital organs from damage, resulting in more effective therapeutic outcomes for the human body.

Benefits of Red & Infrared

633nm

· Reduced fine lines and wrinkles
· Improvement in chronic skin disorders · Hair regrowth
· Reduce fatigue and muscle damage

660nm

· Reduced inflammation
· Reduced neuropathic pain ·
Accelerated wound healing

810nm

· Improved recovery from stroke in certain patients · Improved recovery from traumatic brain injury
· Improvement in psychiatric disorders
· Neuroprotective effect
· Accelerated wound healing

850nm

· Enhanced muscle recovery
· Accelerate healing of post-surgical conditions

940nm

· Improves the nervedamage regeneration process
· Decreased inflammation
· Suppress Herpes Simplex Virus
· Improved bone formation
· Improve telangiectasias

Popular Combination :633-660-810-850-940

Core Advantages

THE STACKING OF VARIOUS PERFORMANCE ADVANTAGES RESHAPES THE SPECTRUM OF HEALTH

Our red light therapy bed harnesses the energy of light through phototherapy technology.
Through fine-tuned wavelengths and integrated performance, we meet diverse customer needs.
This reflects both technological mastery and a profound understanding of phototherapy, unlocking the key to healthy skin rejuvenation with every beam of light.

01 Fashion-Tech Full-Cabin Design

Featuring clean and sophisticated lines, a more spacious interior, and a comfortable lying-down phototherapy experience.
(Excluding models M1 & M2)

02 Multiple Precision Wavelength Combinations

Tailored to different skin types and health needs, with various wavelength combinations to choose from and switch freely.

03 Intelligent Temperature-Sensing Control System

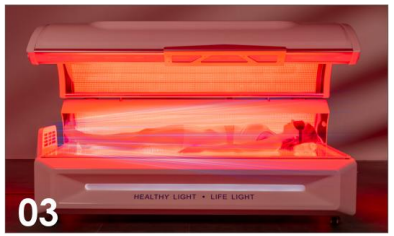

Enables real-time in-cabin temperature adjustment to meet individual comfort preferences.
(Excluding models M1 & M2)

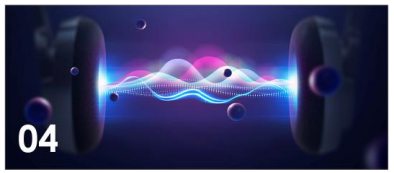

04 Environmental Surround Sound Audio System

Supports Bluetooth connectivity for an immersive experience with your favourite music.
(Excluding models M1 & M2)

Core Advantages

05 Wireless Smart Control System

Intelligently connected, allowing convenient one-touch remote operation for ease of use.
(Excluding models M1)

06 Intelligent Overheat Warning Device

Automatically activates the cooling system when temperature exceeds the set limit, with audible alert for abnormal conditions.
(Excluding models M1)

07 Patented 5-Wavelength Wide LED Panel

Features a self-developed pulse-adjustable system, allowing free control of light intensity.

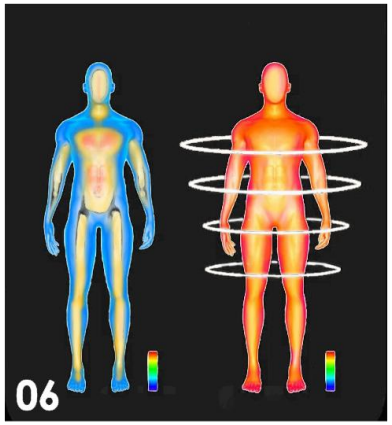

08 High-Quanlity LED Chips

Service life of up to 100,000 hours, ensuring reliable and worry-free operation.

09 ODM/OEM Customization Available

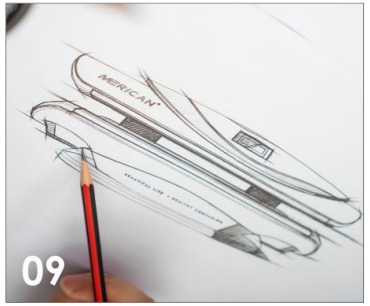

Personalized customization and one-stop service to turn customer ideas or needs into reality.

Product Introduction

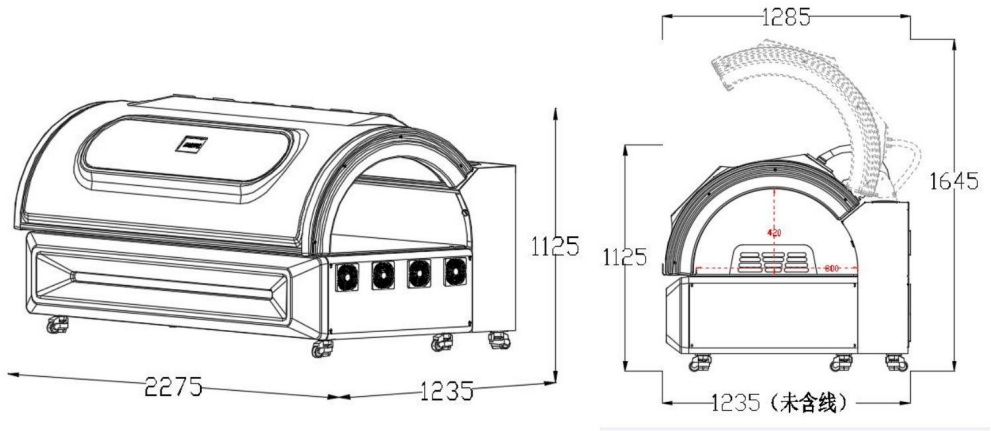

M6

Product Introduction

EXCEEDS INDUSTRY STANDARDS, SPACIOUS, FLAGSHIP, FULLY EQUIPPED

- Flagship Model | Fully Loaded Configuration
- Colorful Panel | Ambiance Enhanced
- Large space | comfortable relaxation
- Precise Wavelengths | Multiple Modes
- Side Cabin Design | Light Effect Amplified
- Overheat Warning | Safety Ensured
- Efficient Heat Dissipation | Powerful Cooling
- Wireless Smart Control | Effortless Convenience
- Surround Sound | Bluetooth Connectivity
- Imported Light Source | Safe & Efficient
- More LED Chips | Higher Power
- Customizable Options | Flexible Configuration

Product Model	M6 Plus | Max
Light Source	Taiwan Epistar LED
Body Color	Lunar White, Crystal Black (customized)
Control System	IoT Management System(pulse frequency modulation)
LEDs	41600 | 42440
Power	6500W
Irradiance	1044 W/㎡
Wavelengths	633+660+810+850+940 nm
Input Voltage	220V / 380V
Product Dimensions	2275*1235*1125mm
Product Weight	380kg
Application Scenarios	Commercial

Product Introduction

M6-L

Product Introduction

MULTI-WAVELENGTH ENHANCEMENT FULLY OPTIMIZED POWER CAPACITY

- High-energy LED | powerful output
- European-style structure | flexible and durable
- Large space | comfortable relaxation
- Multi-wavelength | multi-mode
- Side cabin design | Light Effect Amplified
- Overheat warning | safety ensured
- Efficient heat dissipation | powerful cooling
- Wireless control | effortless convenient
- Surround sound | Bluetooth connectivity
- High quality LED | flexible
- Skin friendly | safe touch
- Negative ion customization | optional configuration

Product Model	M6-L
Light Source	Taiwan Epistar LED
Body Color	Lunar White, Crystal Black (customized)
Control System	IoT Management System(pulse frequency modulation)
LEDs	45000 pcs
Power	5500W
Irradiance	478 W/㎡
Wavelengths	633+810+850+940 nm
Input Voltage	220V / 380V
Product Dimensions	2260*1180*1370mm
Product Weight	350kg
Application Scenarios	Commercial

Product Introduction

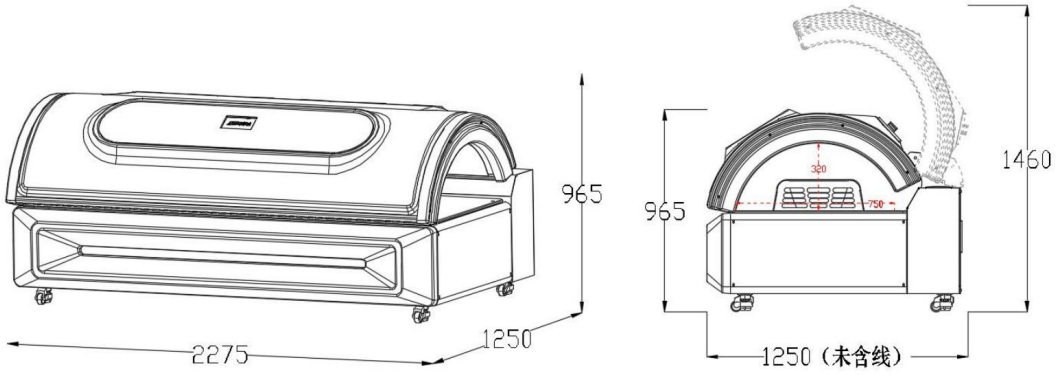

M5

Product Introduction

INHERITING FLAGSHIP DNA, CREATING A BALANCED AESTHETIC OF HEALTH

- Flagship model | Fully loaded configuration
- Vibrant color | immersive atmosphere
- Large space | comfortable relaxation
- Precision wavelengths| multiple mode options
- Imported light sources | safe and efficient
- Overheat protection alert | enhanced safety assurance
- High-efficiency heat dissipation | powerful cooling
- Wireless smart control | convenient and effortless
- Surround sound | Bluetooth connectivity
- European-style structure | safe and stable
- More led emitters | higher power output
- Negative ion customization | optional configuration

Product Model	M5
Light Source	Taiwan Epistar LED
Body Color	Lunar White, Crystal Black (customized)
Control System	IoT Management System(pulse frequency modulation)
LEDs	16560 | 38600 pcs
Power	3000W | 5500 W
Irradiance	630 | 1241 W/㎡
Wavelengths	633+660+810+850+940 nm (customizable)
Input Voltage	220V / 380V
Product Dimensions	2275*1235*965mm
Product Weight	330kg
Application Scenarios	Commercial

Product Introduction

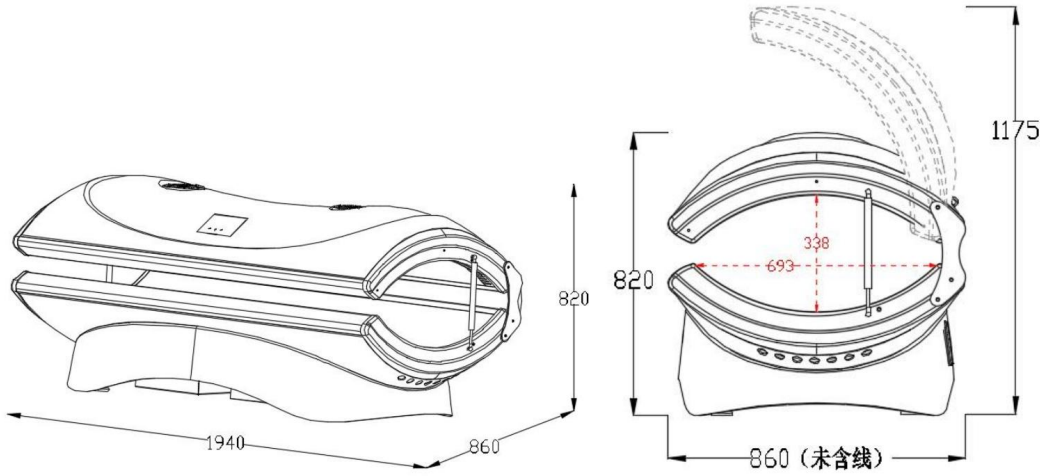

M4N

Product Introduction

REFINED LIGHT ENGINEERING, EFFORTLESS ENJOYMENT

- Vibrant color | immersive atmosphere
- Large space | comfortable relaxation
- Precision wavelengths | multiple mode
- High quality light source | safe and efficient
- Overheat protection alert | safety assurance
- High-efficiency heat dissipation | powerful cooling
- Wireless smart control | convenient and effortless
- Surround sound | bluetooth connectivity
- European-style structure | safe and stable
- Trend-forward colorways | personalized customization

Product Model	M4N
Light Source	Taiwan Epistar LED
Body Color	Lunar White, Crystal Black, Sakura Pink, Golden Red (customized)
Control System	IoT Management System(pulse frequency modulation)
LEDs	10800 | 21600 pcs
Power	1500W | 3000 W
Irradiance	353 | 613 W/㎡
Wavelengths	633+660+810+850+940 nm (customizable)
Input Voltage	110V / 220V
Product Dimensions	1940*860*820mm
Product Weight	140kg
Application Scenarios	Commercial, Household use

Body Color	Lunar White, Crystal Black (customized)
Control System	Digital Touch System
LEDs	12312 pcs
Power	1500W
Irradiance	295 W/㎡
Wavelengths	633+660+810+850+940 nm (customizable)
Input Voltage	110V / 220V
Product Dimensions	1950*860*860mm
Product Weight	38kg
Application Scenarios	Commercial, Household use

Business Map

ROOTED IN THE WORLD, HEALING THE WORLD WITH LIGHT

On the global business map, every country is a point of light

With years of deep industry expertise, Merican has popularized red light therapy beds across Europe, North American, Australia, Middle East and Asia-Pacific. This is more than business expansion – it is a global dialogue on beauty and wellness. Through light, we continue to expand the boundaries of a healthier, more beautiful world.

STRATEGIC PARTNERSHIPS FOR SHARED SUCCESS

A strong brand is built alongside strong partners.

This is not merely a combination of resources, but a comprehensive co-creation of quality—from core technology to user experience—ensuring technological leadership throughout the entire product lifecycle and fulfilling our unwavering commitment to health excellence.

COLLABORATING TOGETHER,WINNING CUSTOMER TRUST THROUGH LIGHT THERAPY TECHNOLOGY

Built on reliable quality and guided by a customer-centric philosophy, we transform professional light therapy solutions into customer satisfaction and shared value growth.
As MERICAN expands globally and strengthens its international vision, partnerships with over 100,000 customers worldwide stand as the strongest recognition of our capabilities.

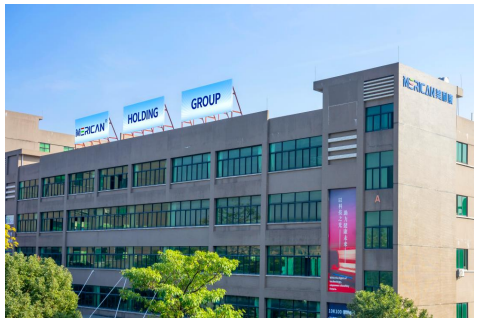

Customization Process

CREATE TOGETHER WITH YOU, LET THE LIGHT BEAR YOUR NAME.

We deeply understand that every brand has its own unique language of light.

Merican's ODM/OEM services are crafted with deep research and development as the pen, and precision manufacturing as the ink. From blueprints to finished products, we provide full support throughout the entire process, ensuring the world is dazzled by your exclusive products.

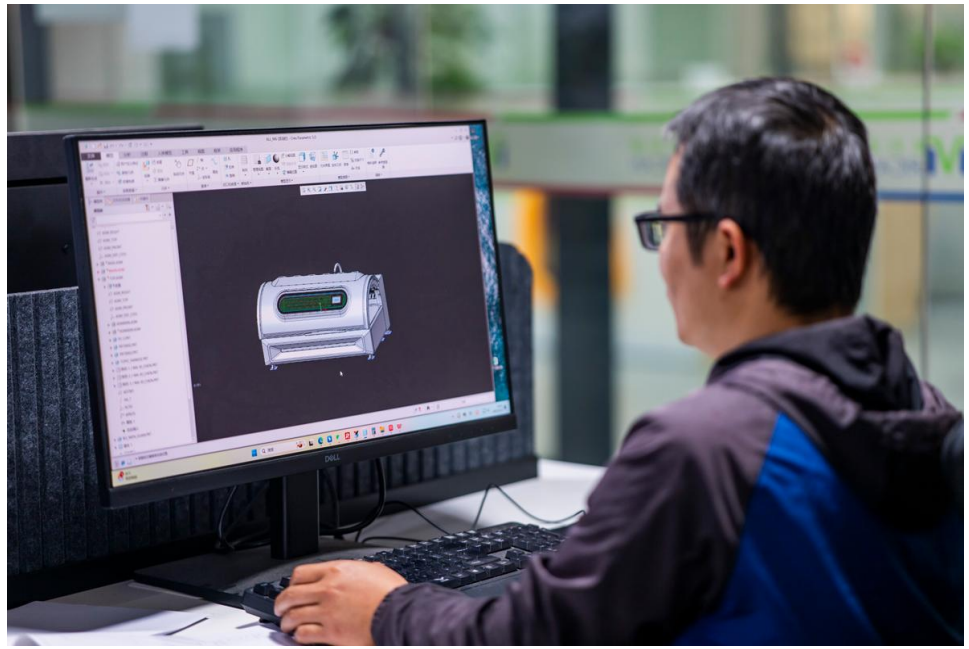

Merican has consistently adhered to a strict quality management system, implementing product quality reviews, process quality control, production and service management, as well as labeling and traceability, to ensure high-quality products and service levels. Our modern production facilities are equipped with workshops for packaging, model processing, electronic component installation, testing, and finished products. We utilize advanced, professional manufacturing equipment and technologies to offer personalized OEM & ODM customization services to global clients, covering everything from product development and design to manufacturing and post-sales maintenance.
