MS-131 ROBOT

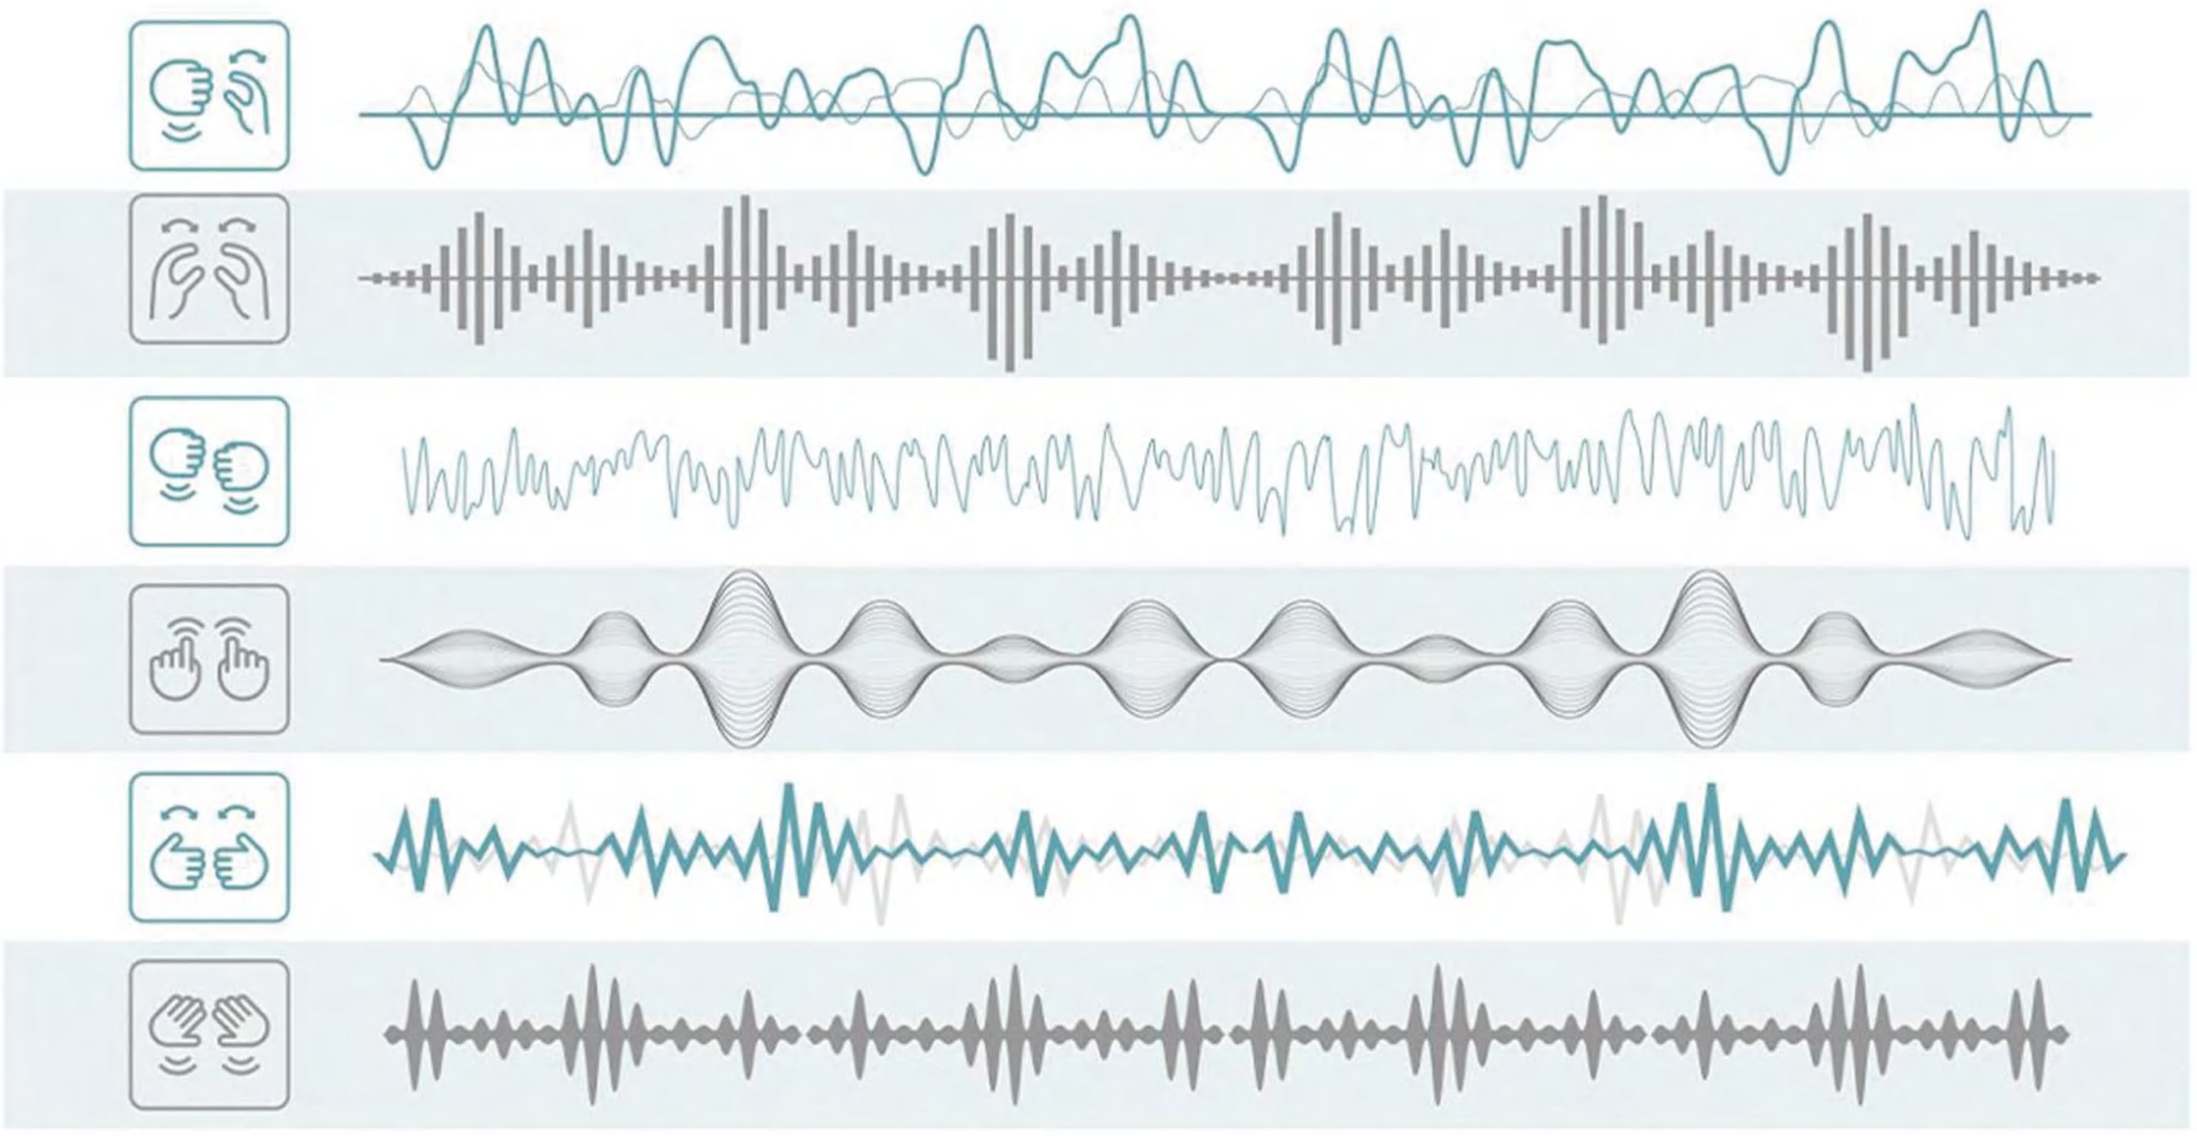

Massage Chair

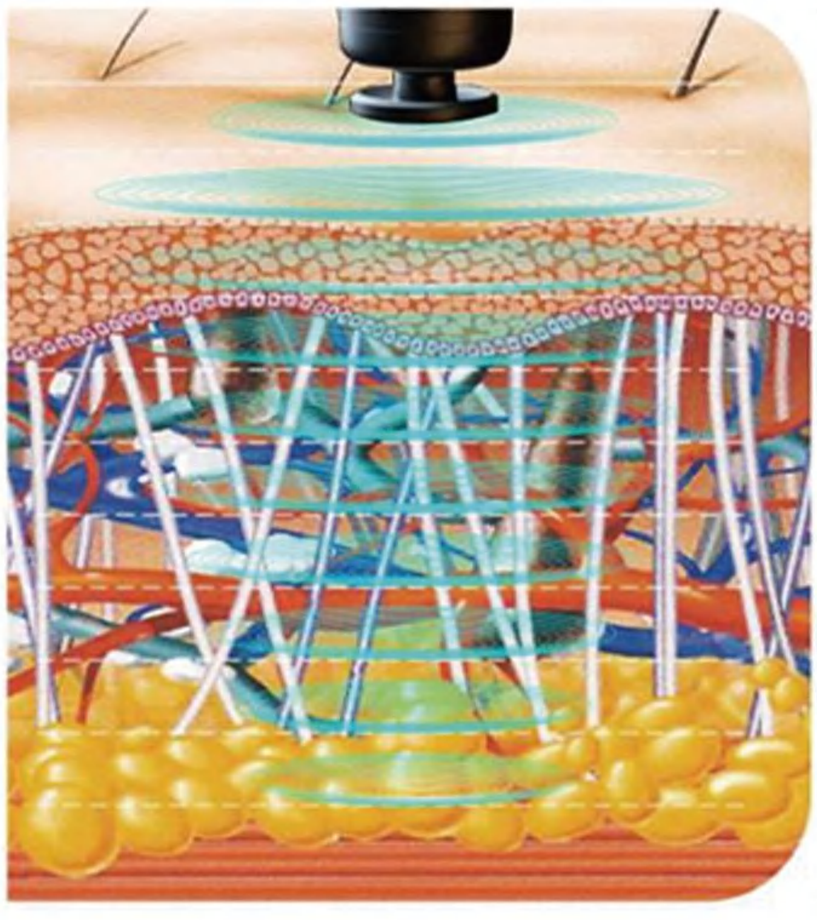

What is Sonic Wave Technology?

Sonic Wave Technology is a technique that uses sonic wave transducers to convert low-frequency sound waves (typically 30-120 Hz) into physical vibrations perceptible by the human body, transmitting them to promote health goals such as mind-body relaxation,stress relief, pain alleviation, and insomnia treatment.

Multi-frequency Sound Therapy Matrix

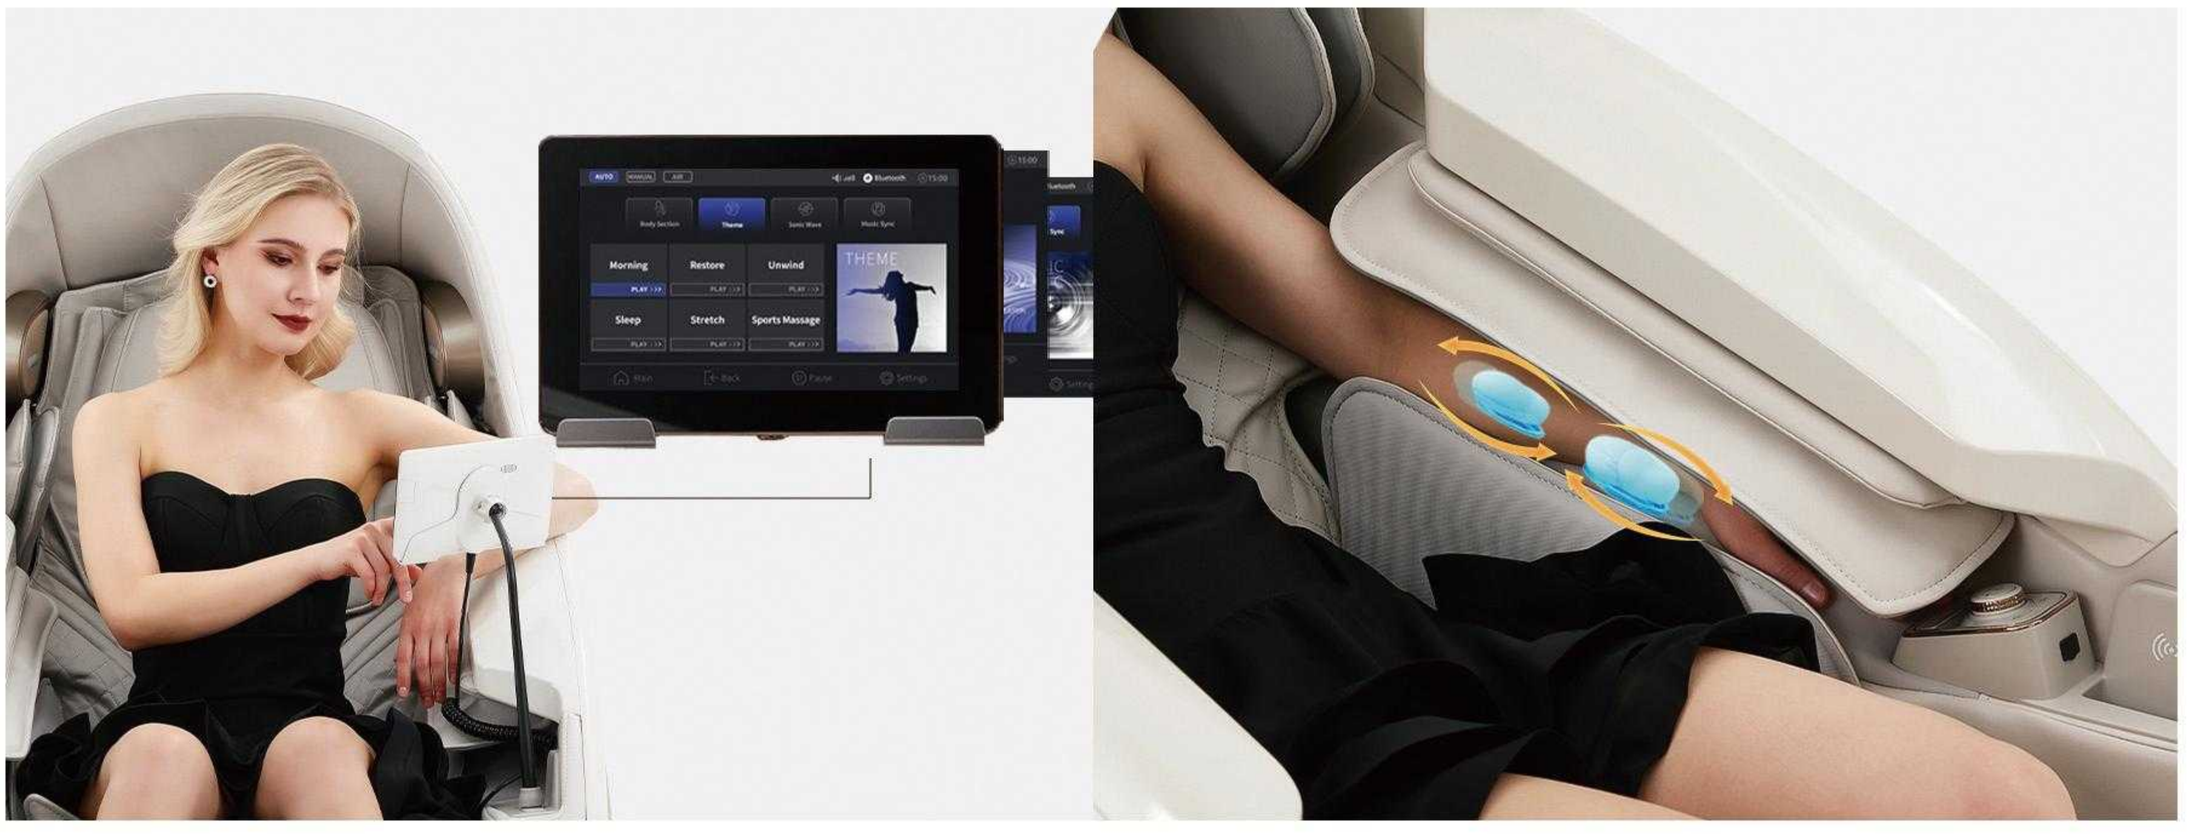

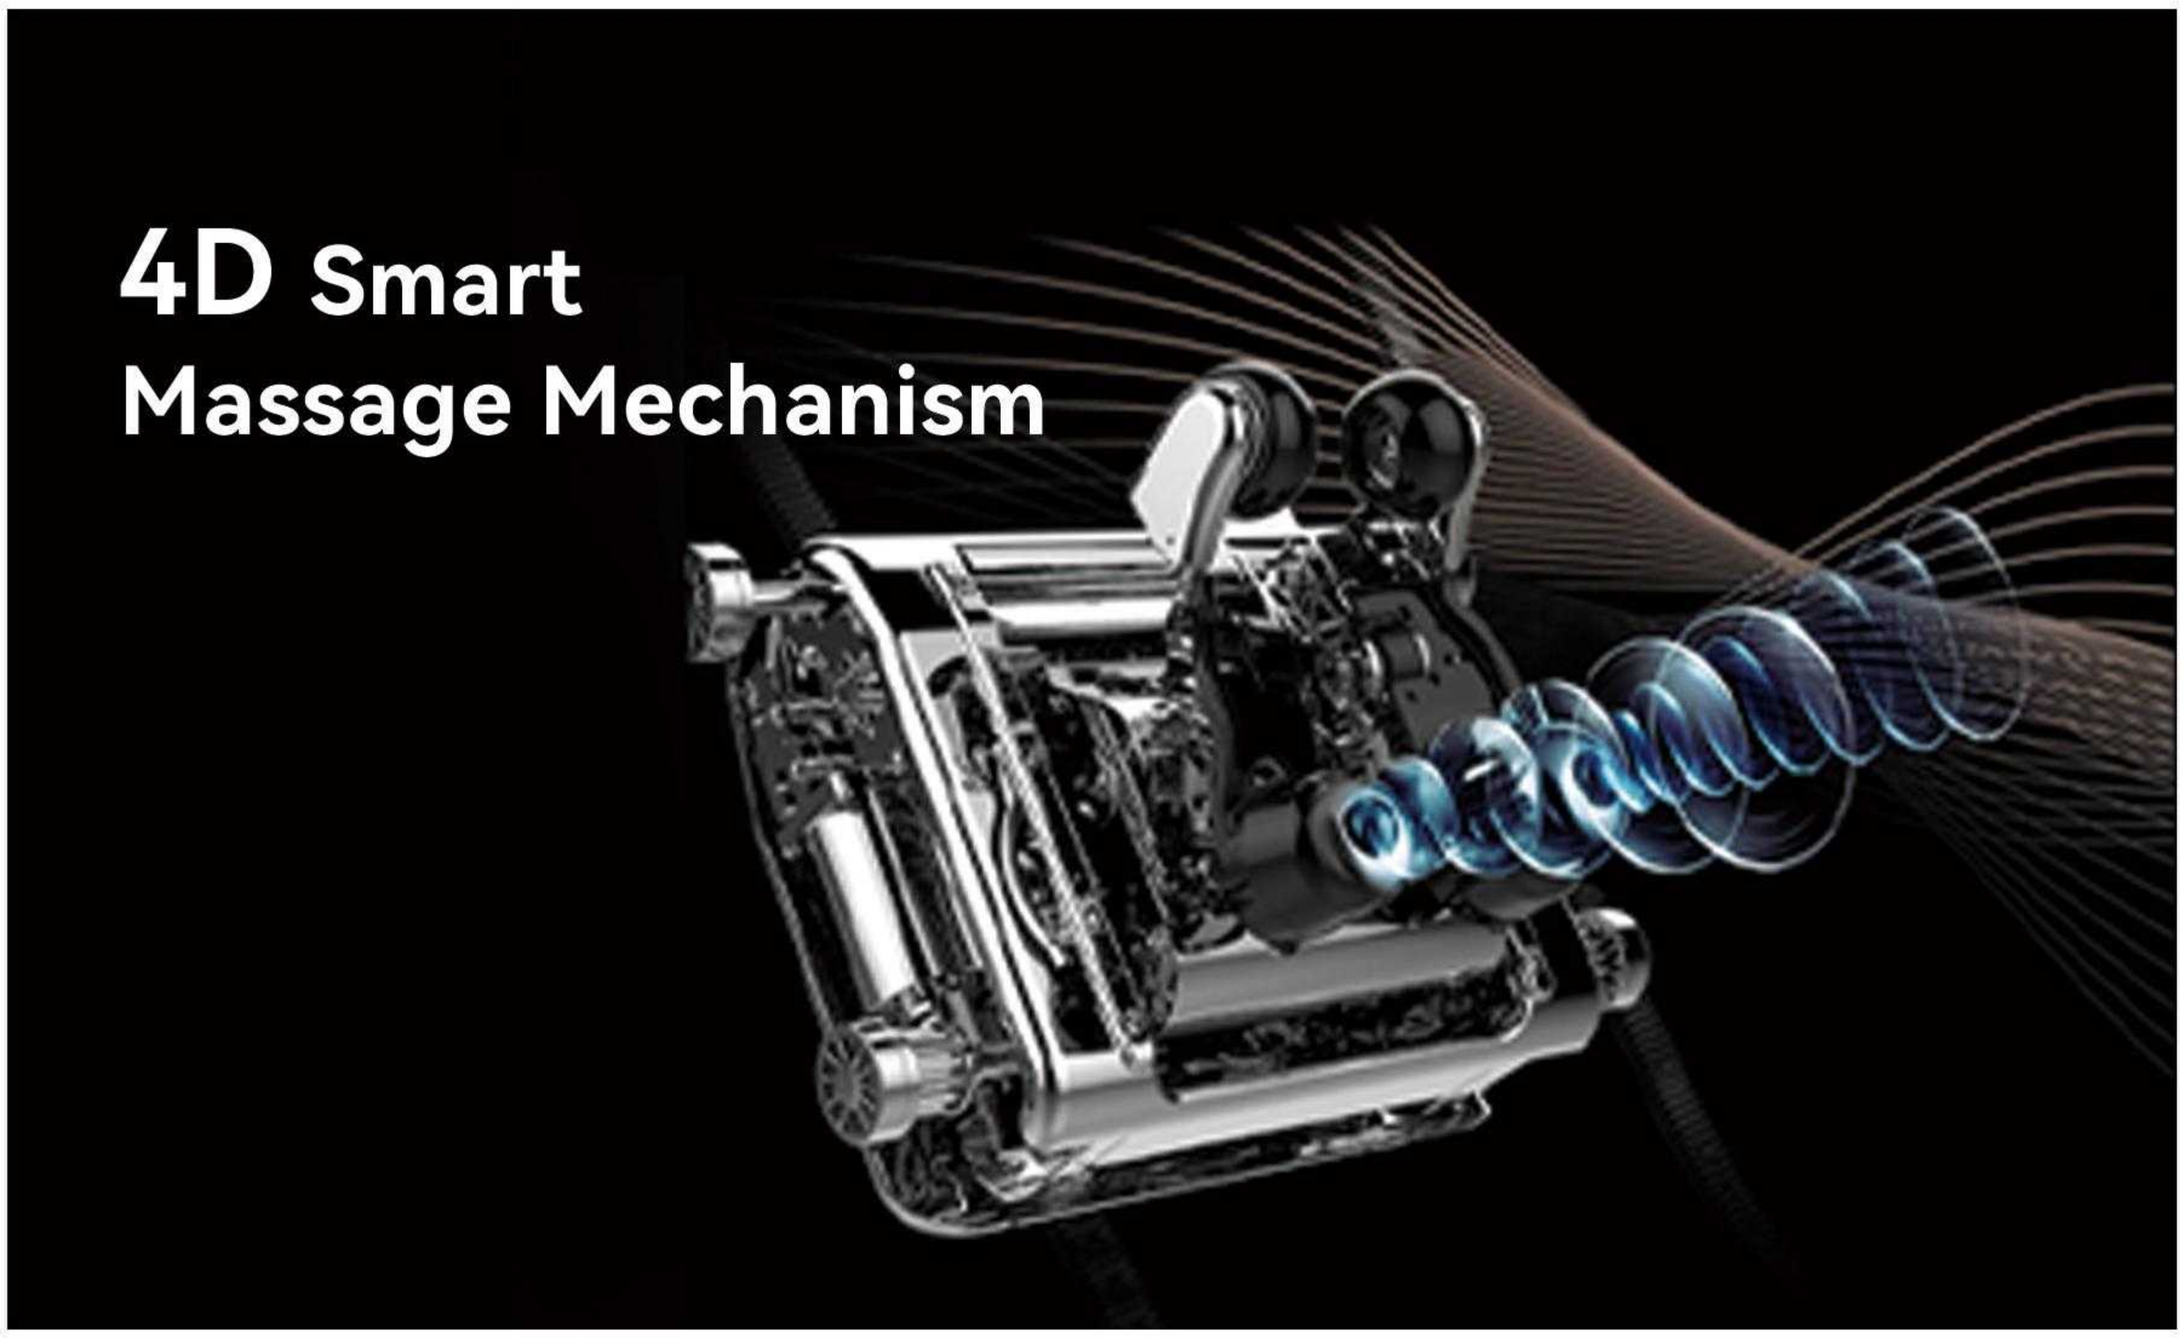

Product Function :

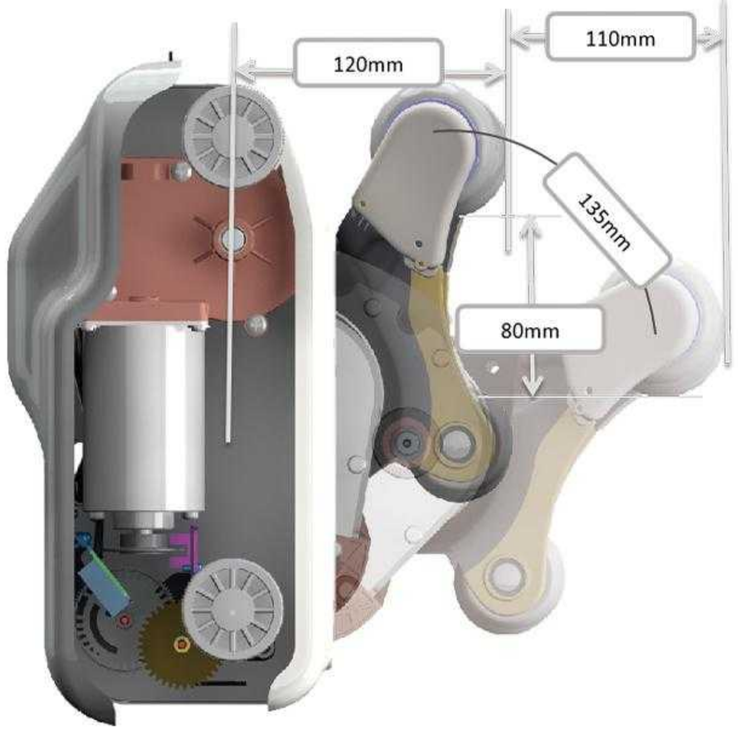

- ·4D Sonic Mechanism
- ·Super Long SL Track
- ·Full Body Airbags
- ·Movement Massage Ball heating
- ·Back and hand heating
- ·Intelligent Anti-pinch
- ·3 Zero Gravity Positions
- ·7 Inch Large Touch Screen
- ·USB Charging
- ·Sleep Aid Music
- ·Separate robotic Legs
- ·Triple Massage Rollers For Foot
- ·Heel rocking massage
- ·Leg kneading massage

24 Auto Massage Programs

Clamp Hands Kneading Plate

Minimum massage amplitude 38mm

Maximum massage amplitude 118mm

Up and down movement speed 10-50mm/s

PRODUCT SIZE

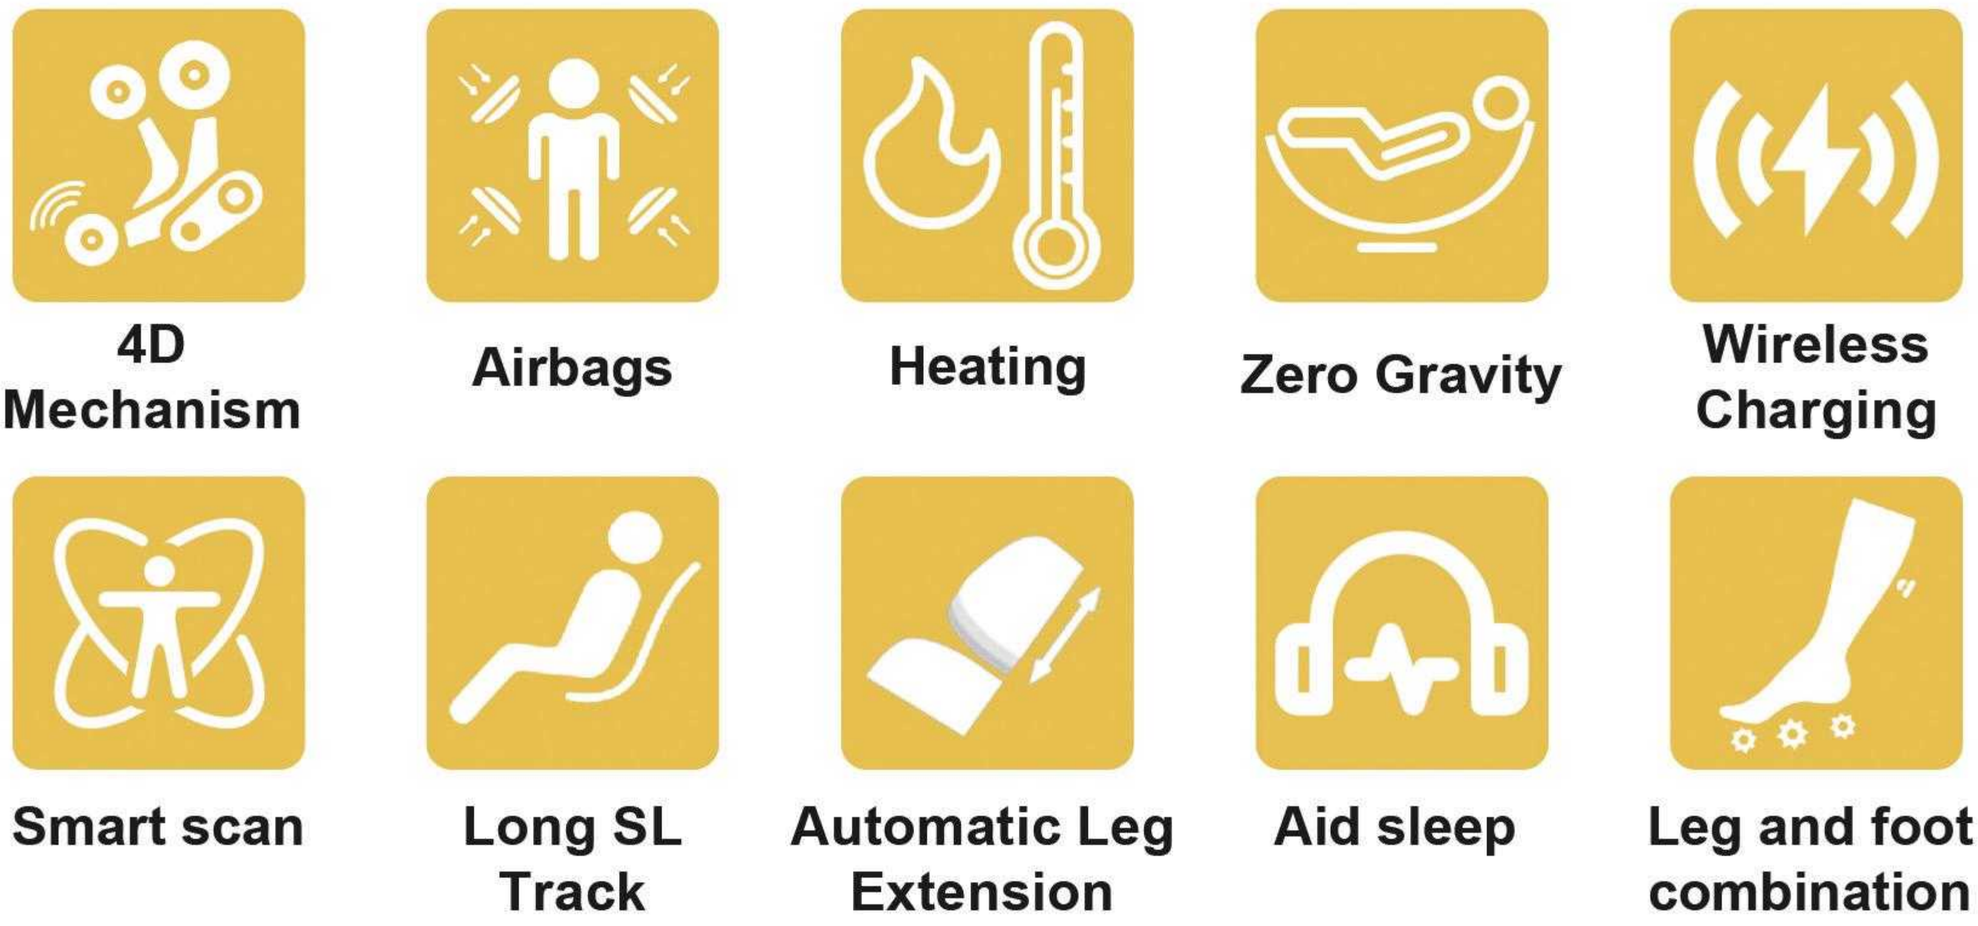

MS-131PLUS

Massage Chair

Product Function :

·4D Smart Massage Mechanism
·Super Long SL Track
·Full Body Airbags
·Smart Body Scan
·Back and hand heating
·Intelligent Anti-pinch
·3 Zero Gravity Positions
·Ultra-thin Touch Screen
·Wireless Charging
·Sleep Aid Music
·Triple Massage Rollers For Foot
·Heel rocking massage
·Leg kneading massage

PRODUCT SIZE

Specification:

AC：110V~240V

Ctn size (Main body)：1460*856*1245mm

Ctn size (Footrest)：580*555*640mm

Power：170W

G.W/N.W：174/153kgs

Volume：1.78cbm
